assignment code 3 (day 4)

Question – Attendance Calculator

Code –

```
def calculate_attendance(attendance):  
    if attendance >= 90:  
        grade = "A"  
    elif attendance >= 80:  
        grade = "B"  
    else:  
        grade = "C"  
    return grade  
  
attendance = float(input("Enter your attendance percentage: "))  
grade = calculate_attendance(attendance)  
print(f"Your grade is: {grade}")
```

```
def calculate_attendance(attendance):  
    if attendance >= 90:  
        grade = "A"  
    elif attendance >= 80:  
        grade = "B"  
    else:  
        grade = "C"  
    return grade  
  
attendance = float(input("Enter your attendance percentage: "))  
grade = calculate_attendance(attendance)  
print(f"Your grade is: {grade}")
```

Output –

Enter your attendance percentage: 93

Your grade is: A

```
Enter your attendance percentage: 93  
Your grade is: A
```
